

# Call for a Special Issue in Quaternary International

In the follow-up to our Session “Using the “multi-proxy approach” to detect landscape and environmental changes” held at the INQUA meeting in Dublin we would like to organise a Special Issue in QI named “Multi-Proxy at the Seas and Coasts”

To promote the „Coastal and Marine Processes (CMP)“ Commission of the INQUA to which our Session was associated we would like to open this SI to papers dealing with **Marine, Coastal, and Deltaic topics**

Please send us an email: [annapint@web.de](mailto:annapint@web.de) and [seeliger@em.uni-frankfurt.de](mailto:seeliger@em.uni-frankfurt.de) including a Title, a List of Authors and 2-3 possible reviewers for your proposed paper until 30.09.2019

Best wishes from Frankfurt and Cologne  
Anna and Martin
